

Gutter Covers

Highly Recommended & Worth Consideration

You realize the importance of keeping your gutter system flowing properly and functioning well. After all, a little bit of debris can quickly clog the outlets, rendering them inoperable. If they don't work properly, you have spill over making a mess of the front of the gutters and the house. This spill over erodes the lawn, makes a mess of the landscaping and bark mulch and leads to water in the basements. Not to mention the back splash that can lead to costly wood rot. And worst of all, if the gutters aren't draining properly, they can hold water and moist organic materials which can lead to plants and mold growing and is a perfect breeding ground for mosquitoes. So, gutters that don't function right are really a health hazard.

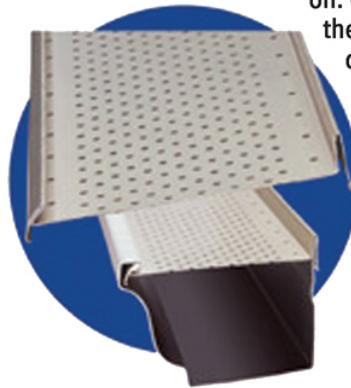

Gutter cleaning is the traditional way that this had been dealt with, cleaning your gutters once, twice, three or even four times a year to keep all of the debris out of the gutters. And while we do offer this service, we find that is really isn't the best solution because no matter how we try, the timing will definitely not be perfect. Even if we clean your gutters, the next day there can be a wind storm and a small amount of debris can land in the gutters, make its way to the outlet and again, cause the gutters to not function properly. And as for Fall, this is a terrible time to try and clean gutters because you try to wait until the last leaf falls but before the debris freezes solid?this almost never works out right. A gutter cleaning is only a temporary solution.

The best and permanent solution is to install a well engineered gutter cover.

Our two most popular covers

Leaf Relief –This product comes with a 10 year warranty. It sits flat on the gutters. It has a lot of very small holes that are similar to the colander that you'd find in the kitchen. Debris is kept out of the gutters quite nicely, but can sit on top of the cover. We find that generally the leaves will dry up and blow off. On occasion, however, the top of the cover may need to be cleared off. This is a simple thing to do and generally we charge a much lower price to clear off the cover from time to time.

MSG Gutter Hood - This is our premiere product. It offers the best gutter protection, least maintenance and a lifetime warranty. It is an improved design off the expired Gutter Helmet (tm) patent. It is installed with custom brackets and nothing gets attached to the roof. It matches the pitch of the roof and the color of the shingles. It works off water tension. The engineering is such that the water makes its way into the gutter, but the debris breaks off and falls to the ground. Because it doesn't sit flat on the gutter, debris doesn't collect on the cover. This is an excellent product.
